

VMware hypervisor

The latest version of VMware Workstation Pro 25H2 was downloaded from the Broadcom Support Portal and installed using the command `sudo sh VMware-Workstation-Full-25H2-24995812.x86_64`. In the Virtual Network Editor, VMnets were assigned as follows.

Table 1: VMnet to subnet assignment in the Virtual Network Editor

VMnet name	Type	Subnet
vmnet0	bridged	–
vmnet2	host-only	10.0.27.0/24
vmnet3	host-only	10.0.10.0/24
vmnet4	host-only	10.0.17.0/24

The tickboxes `Use local DHCP service to distribute IP addresses to VMs` and `Connect a host virtual adapter (vmnetx) to this network` were left unchecked.
